

Presentation Effectiveness

Confident In English

In-Person

Over 4 high octane sessions, this Confident English course will make you confident to speak English and show your full ability and talent.

What you'll learn

You already have the English capacity you need. All you need is help in learning how to release that capacity and make it work for you. End your fear of phone conferences and international business meetings! learn to express themselves in English with confidence.

Why you want to learn it

Why don't Japanese team members show their ability? Culture obviously plays a part. Modesty, shyness, don't be the "nail that gets hammered down", embarrassment about making a mistake, etc. That culture set will not work in a gaishikei (foreign multinational) company, so Japanese team members must become more flexible and adapt.

How it will help you

Asking questions, stating your opinion, seeking further details – this is all you have to do to be part of the Conference Call or the meeting with the VIPs from overseas. We teach how to do those things with confidence. They don't want to make a fool out of themselves by making mistakes. That self-consciousness is holding them back from speaking English.
